

WEB-SPRINT

Round 2 — Participant Guidelines

Theme: Code it. Web it. Sling it.

Presented by AiMSA x GFG Campus Body PCCOE, Dept. of CSE (AI & ML), PCET's Pimpri Chinchwad College of Engineering.

Venue: Old Reading Hall | Date: 18th August 2026

1. Event Overview

Round 2 is the final build round of WEB-SPRINT. Each team will clone their tier's target website within a fixed time window, guided by the rules below. Read this document carefully before the event begins — all decisions by organizers and judges during the event are final.

2. Event Timeline

- Commencement: 12:00 PM
- Total Duration: 4 hours
- Website Reveal: shown at the start of the round for 30 minutes only, after which it will not be shown again
- Build Phase: begins immediately after the reveal window and continues for the remainder of the 4-hour duration
- Somewhere along the way, every Spider-Man, in every universe, faces a Canon Event. So will you.
- Submission Deadline: 4:00 PM sharp

3. Website Reveal Rules

- Your tier's target website will be displayed on the main screen for exactly 30 minutes at the start of the round.
- Once the 30-minute window ends, the website will not be shown again for the rest of the round.
- Handwritten or typed notes and sketches are allowed during the viewing window.
- Photographs and screenshots of the displayed website are strictly not allowed, at any point during the event.
- There is no live access to the target website at any time — observe carefully during your one window.

4. Build Phase Rules

- Teams may use any code editor or framework of their choice.
- AI tools are allowed for code generation and assistance only.
- AI tools must not be used to browse, fetch, or inspect the target website.
- No external screenshots, saved images, or scraped assets of the original website may be used at any stage.
- Only resources obtained during the event may be used.
- Teams must submit their work before the 4:00 PM deadline. Late submissions will not be accepted.

- Plagiarism or unfair collaboration between teams leads to immediate disqualification.

5. Test Your Spider-Man Knowledge

At some point during the event, every web-slinger's knowledge of the Spider-Verse will be put to the test. Stay sharp — you won't get advance notice of when.

6. Scoring

Teams are ranked only within their own difficulty tier. Final ranking within each tier combines:

- Time Taken — faster completion within the allotted window scores higher.
- Similarity — judged via an objective visual/structure comparison and a judge's rubric covering UX, responsiveness, and code quality.
- Additional bonus points may be awarded during the event for reasons that will become clear as the day unfolds.

The highest-scoring team in each tier is declared that tier's winner.

7. General Conduct

- Judge and organizer decisions are final.
- Respect organizers, volunteers, and fellow participants at all times.
- Any attempt to bypass the no-screenshot/no-photograph rule leads to disqualification.
- Keep an eye and an ear out throughout the round — WEB-SPRINT has a way of throwing surprises at every universe.

8. Winning Tips

- Observe carefully during your 30-minute window — structure first, details second.
- Manage your time; a fast, clean clone beats a slow, perfect one.
- Expect the unexpected. Every universe has its Canon Event.
- Code it. Web it. Sling it.
